DETAILED ACTION

Drawings

1. Figure s 2A and 3A should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Moench et al. (6,631,996).

Moench et al. (6,631,996) discloses an illumination system and method for of controlling the illumination comprising:

Controlling a driving waveform of a lamp (12A) with current controller (16);

A synchronized control means for controlling the current synchronously with image/color data with synch/phase shift controller (18) (See column 4 Lines 45-53)

which obtains the image data and generates the synchronous signal regulating the light source current driver.
